

SELECTED INDUSTRIAL EXPERIENCE

Statement of Qualifications

Re: MEP Statement of Qualifications

Thank you for considering WGI as a partner. Our commitment is to YOUR success, and below are the benefits of selecting WGI MEP services.

REVIT Expertise:

- WGI makes full use of Autodesk's REVIT platform. Our MEP systems are modeled with accurate geometric and engineering information, making coordination like space considerations and scheduling integral to the design process.
- WGI actively leverages the complete capabilities of REVIT, making use of the most current technologies that integrate with the program. Our dedication to the most current tools translates to better design and clearer communication with the whole project team.
- WGI MEP utilizes best-in-industry technologies for communication and model sharing. For example, every project is shared via the BIM360 Cloud Platform, allowing consistent BIM sharing between teams.

Team Makeup:

- Our team is an expert in our field. Most of our associates are licensed Professional Engineers. Our core team has been consistent for years, specializing in the nuances of jurisdictions where we practice.
- WGI MEP staffs every project for success. Your project will be assigned a project manager, and a lead engineer in each discipline involved. Additionally, WGI tasks a licensed engineer team leader the responsibility for overall design coordination, quality assurance, and product consistency. We find this model allows you to go to the right person with your needs throughout the project.

Quality:

- At WGI, every project goes through our rigorous QA/QC policy.
- Quality Assurance is highlighted at every stage with peer reviews, standards reviews, clash detection, and interim plan reviews by senior staff.
- Quality Control is completed in a multi-stage process with the engineer of record, project manager, and a principal engineer completing a review before a project is issued for construction.

At WGI, we believe the difference is apparent. Our dedicated experts have the technology, processes, and support necessary to deliver success to your team. We look forward to speaking with you further and supporting your next project.

Regards,

A handwritten signature in black ink, appearing to read 'Marc Remmert', with a stylized flourish extending to the right.

Marc Remmert, PE
Director, MEP Engineering

**THIS IS
WHO WE ARE**

WGI is a national design firm in the public and private infrastructure markets.

Founded in South Florida in 1972, WGI grew from a private client base and diversified into the public sector by growing our expertise to include a wide variety of disciplinary services. With nearly 600 professionals in 20 offices nationwide, WGI is concentrated on providing cutting-edge efficiencies and solutions that affirm our national trademark: *Tomorrow's Infrastructure Solutions, Today.*

WGI is a carefully chosen balance of experienced industry veterans and youthful visionaries. Our combination of talents enhances WGI's ability to execute our strategic plan of market leadership while meeting evolving infrastructure demands and maintaining our focus on autonomy, smart and connected cities, resiliency, and sustainability.

An award-winning firm consistently recognized for exceptional service, commitment to providing a superb work product, and continuing a four-decade tradition of being engaged, passionate, responsive, accountable, creative, and inspired. WGI is committed to remaining at the forefront of innovation by investing in the tools and the people necessary to remain constantly agile and able to deliver tomorrow's possibilities, today.

WGI serves a multitude of private clients, public agencies, and municipalities. We remain dedicated to the development and economic prosperity of the many local communities in which we live and work. We intently focus on delivering our professional commitments while encouraging our associates to "give back" by supporting a variety of non-profits and professional organizations through their leadership, volunteerism, and sponsorship.

**WE'VE DONE
THIS BEFORE**

PARMER SECTOR 7

Austin, Texas

Parmer Sector 7 consists of three corporate industrial buildings totaling approximately 355,000 square-feet. These three buildings are a part of the Parmer Austin development — a 297-acre, \$1 Billion master-planned technology and office park in the heart of the Austin Technology and Business Corridor that will include multiple retail, hospitality, and entertainment venues.

WGI provided mechanical, electrical, and plumbing (MEP) engineering and construction administration services for the Sector 7 area and several of the other buildings in the Parmer Austin development.

CHANDLER CREEK LOT K

Round Rock, Texas

Chandler Creek Business Park is a mixed-use 150-acre development in Round Rock. The development is located in the city's triple freeport zone and has immediate access to IH-35 and SH-130.

Lot K consists of 4 buildings that include 128,306 square-feet of warehouse and 32,690 square-feet of office space. The buildings feature contemporary architectural and landscaping design, tilt-wall construction, and 24' clear height.

WGI provided mechanical, electrical, and plumbing (MEP) engineering services for the project.

RDO EQUIPMENT CO.

Buda, Texas

RDO Equipment Co. is a rapidly expanding Texas-based agricultural and construction equipment company that provides expertise from sales to parts and service on specialty equipment.

WGI was engaged as the Civil and MEP design engineer on the project located in Buda, Texas. This project includes the design of a new, ground-up building consisting of approximately 36,500 square-feet of equipment shop, warehouse, and new retail space.

RESUMES

DIRECTOR, MEP ENGINEERING

Marc has extensive experience in electrical engineering, distribution design, circuit calculations, and lighting simulation analysis. He has worked on a variety of projects, including vertical mid- and high-rise structures, electrical primary infrastructure of master-planned urban communities, and roadway lighting design for both urban and retail areas. Marc has experience in the preparation of lighting analyses and designs using the AGI32 and Lithonia Visual software platforms. He works with local agencies to provide feasible solutions to electrical distribution and lighting that meet the needs of the community from both aesthetic and functional perspectives.

Joe is a licensed mechanical engineer with experience across a variety of project types and scopes of work within the built environment. As a MEP project manager at WGI, Joe partners with clients to ensure that MEP design meets and exceeds the owners project requirements throughout project delivery. With a technical background, Joe effectively guides the client through design strategy and decision making. A core focus for Joe is sustainability through which he seeks to identify cost-effective strategies that make buildings less environmentally impactful. With experience at architecture firms and as a 3rd party consultant, Joe understands the communication needs on all sides of the design and construction table. Joe believes in feeling the same ownership of a project as the client and takes pride in ensuring the integrated team creates spaces that are beautiful, sustainable, and exceed expectations.
